## Skills

Python

C/C++

Node.js

PHP

HTML / CSS

Photoshop / Illustrator

I would say that I'm humble, hard-working, and I like to challenge myself on a regular basis. I like to set goals in both my personal and professional life and then strive to accomplish them. I love web designing and development. Along with that I also keep keen interest in ML/AI.

## Education

2016-10 -

## Projects

**COVID-19 Detector** was the most recent project done for a competition "Code for Cause 2020" by KATHFOSS. We build a website where people could test for covid-19 through symptoms and also the website gave real-time status of covid-19 throughout the world.

**MTT (Mobile Transportation Tracker)** was an android application built in JAVA that could track the location of public vehicles so that the people could leave their home accordingly preventing time lost waiting for the bus. This project won the "Prixa Excellence Award" and was selected to be the best project.

**PEDIASITE** was a website build in PHP which focused on the newly born babies aiding their parents to look after their health care.

**American Sign Language Platform** was a project that focused on the dumb people to aid them in communicating through hand signs converting it into a speech through text

**Personal Website** is a website built in Node.js for personal use during leisure

## Experiences and Participations

**Pre-Events Co-ordinator** at IT-MEET 2020, Kathmandu University

**Participation** in Localization for Libre Office
