Projects

COVID-19 Detector was the most recent project done for a competition "Code for Cause 2020" by KATHFOSS. We build a website where people could test for covid-19 through symptoms and also the website gave real-time status of covid-19 throughout the world.

MTT (Mobile Transportation Tracker) was an android application built in JAVA that could track the location of public vehicles so that the people could leave their home accordingly preventing time lost waiting for the bus. This project won the "Prixa Excellence Award" and was selected to be the best project.

PEDIASITE was a website build in PHP which focused on the newly born babies aiding their parents to look after their health care.

American Sign Language Platform was a project that focused on the dumb people to aid them in communicating through handsigns converting it into a speech through text

Personal Website is a website built in Node js for personal use during leisure
